Program overview

An application to browse the program is also available here.

Keynote speaker informations are available on the program page.

Tutorial details are available on the tutorials page.

| Wednesday (July 10) | Thursday (July 11) | Friday (July 12) |

This is the main meeting of the **R user and developer community**, its program consisting of both invited and user-contributed presentations:

- The invited keynote lectures cover a broad spectrum of topics ranging *from technical and R-related computing issues to general statistical topics of current interest*.
- The user-contributed presentations are submitted as abstracts prior to the conference and may be related to (virtually) any R-related topic. The presentations are typically organized in sessions of either broad or special interest, which also comprise a free discussion format.
